

ARE YOUR TABLE PADS WORN OUT?

UPGRADE TO *PATIENT COMFORT SYSTEMS* NEW ANTIMICROBIAL PADS AND POSITIONERS!

- Ultra-strong fabric with **sewn and welded** seams to protect the TEMPUR® core material from body fluids.
- Permanent **antimicrobial** agent incorporated into both the covering fabrics and TEMPUR pad core.
- Vapor, moisture impervious and **latex free** covering fabric.
- Can be cleaned with any standard approved hospital disinfectant.
- The ultimate in **pressure management** technology for MRI, CT and PET scanners.
- Studies have shown **decreased patient motion** during MRI scans using PCS pads, due to enhanced patient comfort.
- The **Center for Disease Control** advises any pads that are frayed or torn should be replaced since it is not possible to adequately clean.
- Be prepared for your next **JCAHO** inspection.
